

Reporting Covid-19 Result Method

If the test result is negative: Continue to comply with all applicable rules regarding contacts and protective measures. Even if the test is negative, there may be an infection.

In case of doubt, repeat the test after 1-2 days because the coronavirus cannot be accurately detected at all stages of infection.

If the test result is positive:

1. Currently, there is a suspected infection of COVID-19.
2. Contact your doctor or local health department immediately.
3. Comply with the local self-isolation guidelines.
4. Perform PCR test for confirmation.

If the test result is invalid: It may be caused by incorrect test operation. Please repeat the test. If the test result is still invalid, please contact your doctor or COVID-19 testing centre.
